

Hi Friend!

i'm jo glick

Design isn't just a job for me; it is a way of life. I am not afraid to take design risks, and I think it is important to push the limits to achieve something beautiful and surprising. I love bright, vibrant colors and creating unique things. When I can't find exactly the piece of art or furniture I am looking for, I find a way to make it myself or have it made to match my vision. My personal passion lies in designing children's spaces, because there are fewer limits.

When I was younger, I would beg my mom to take me to the craft store. I would wander the aisles, touching the fabrics, reams of colorful papers and baubles, and dream of the endless projects I could create. In fifth grade, I made little television broaches my mom sold at the public television station where she worked; the most rewarding thing was seeing her friends wearing them!
